

Every facility that has a mop sink, knows that this area is prone to drain clogs and plumbing problems due to the amount of dirt, trash, and other debris that goes down this drain. We have solved this problem with the Mop Sink Basin Strainer.

Mop Sink Basin Strainer

Disposable Filters

Product Features:

- With the dimensions of 21" wide x 21" x long x 8" tall, this strainer fits most standard mop sinks.
- Hard plastic strainer sits inside the mop sink, and the fine-mesh filter fits over the plastic strainer.
- Filter keeps small debris such as dirt out of drains
- Disposable for quick and easy clean up
- Prevents dirty mop water from clogging up drains!
- Prevents mop strings from clogging your drains!
- Available in custom sizes and shapes!

1 Place strainer in mop sink

2 Place fine mesh filter on the strainer

3 Dump dirty mop water onto filter and watch how much debris it captures!

When filter gets full of debris, throw away and replace with a new filter, keeping mop sinks clean and free from drain clogs!
